DoorDash

NASDAQ : DASH · Mature-Company DCF

$78.38B mkt cap · 415M sh · $5.5B cash, zero debt · ~$5.5B net cash; ~415M basic / ~442M diluted shares (SBC dilutes ~$1.3B/yr); GOV $102B / revenue $13.72B FY25 (+27% GOV); $1.8B FCF; first +FY GAAP income 2024; Down ~40% from highs; advertising ~$1B run-rate, Deliveroo+Wolt international, ~33x EV/FCF

2 July 2026 · the qualitative

$188.87

THE CENTRAL QUESTION

Is DoorDash a dominant local-commerce network whose profitability is about to inflect — or a high-SBC, ~33x-FCF delivery business punished for spending ahead of returns?

DoorDash trades at ~$66B (≈$159/sh, down ~40% from $285) — ~33x EV/FCF on $1.8B FCF, but GOV is still compounding +27% ($102B) and adj-EBITDA hit $2.8B (~2.7% of GOV). The crash is a margin/SBC problem, not a growth one. The mature DCF asks whether advertising (~$1B run-rate) + New-Verticals (grocery) unit economics + international (Deliveroo/Wolt) inflect the 2.4%-of-GOV margin upward, against ~$1.3B/yr SBC dilution. The finding: roughly fair — the 20%+ growth + margin inflection are offset by the premium FCF multiple + dilution.

PROBABILITY-WEIGHTED EXPECTED VALUE

$156.70 expected fair value today

-17.0% vs spot $188.87

FORWARD COMPOUNDED VALUE

+5y	+10y	+15y	+20y

DoorDash scenario narratives

PROBABILITY WEIGHTS

Ultra Bear 15% Bear 27% Base 33% Bull 18% Ultra Bull 7% · Weighted expected $156.70 (-17.0% vs spot)

ULTRA BEAR $67.43

-64.3% vs spot

Probability 15%

Growth slows; margin stalls; SBC dilutes.

WHY 15%

The bear: the margin inflection stalls and SBC dilution + Uber competition cap returns. 15% weight on spending-ahead-of-returns persisting.

WHAT HAPPENS

US restaurant delivery saturates, New Verticals stay margin-dilutive, Uber Eats presses, and ~$1.3B/yr SBC keeps diluting. GOV growth decays toward high-single while the 2.4%-of-GOV margin stalls.

DCF ~$67 (-58%) — a no-margin-inflection, SBC-heavy delivery business at a premium multiple de-rates hard.

BEAR $103.28

-45.3% vs spot

Probability 27%

Decelerates; modest margin inflection.

WHY 27%

Growth decelerates and the margin ramp is slower than the bull case. 27% weight — a plausible 'grows but stays expensive' path.

WHAT HAPPENS

GOV decelerates to low-double-digits and the margin inflects only modestly as ads scale but New Verticals stay competitive; SBC dilution continues.

DCF ~$103 (-35%) — still below spot; the premium FCF multiple isn't covered by a modest inflection.

BASE $158.19

-16.2% vs spot

Probability 33%

Margin inflects; ads scale; ~15% growth.

WHY 33%

Requires the guided 2H'26 margin inflection + ads scaling + mid-teens GOV. 33% as the central, near-spot outcome — but SBC caps the per-share.

WHAT HAPPENS

The modal path: advertising scales past $1B, New-Verticals (grocery) unit economics turn positive in 2H'26, and the network compounds GOV mid-teens — lifting the FCF margin toward 20%.

DCF ~$158 (-1%) — roughly fair; the 20%+ growth + margin inflection just cover the ~33x FCF entry after the de-rate.

BULL $237.79

+25.9% vs spot

Probability 18%

Ads + grocery scale; margin to ~5% of GOV.

WHY 18%

The margin inflection compounds (ads + grocery + international) and growth stays high-teens. ~18%; the bull the de-rate is discounting away.

WHAT HAPPENS

Advertising + grocery + international (Deliveroo/Wolt) drive the GOV margin toward 4-5%, GOV compounds high-teens, and SBC moderates as a share of revenue.

DCF ~$238 (+50%) — the local-commerce network re-rates as the margin inflection proves durable.

ULTRA BULL $338.45

+79.2% vs spot

Probability 7%

Dominant local-commerce platform.

WHY 7%

Full local-commerce dominance + a high-margin ad/autonomy mix. ~7%, the asymmetric upside.

WHAT HAPPENS

DoorDash becomes the dominant local-commerce platform (restaurants + grocery + retail + ads + autonomy optionality) compounding GOV ~20% at peak network margins.

DCF ~$338 (+113%) — the local-commerce 'everything' platform; ~7% probability.

Sources: DoorDash FY2025 10-K (GOV $102B, revenue $13.72B, adj EBITDA $2.8B, FCF $1.8B, net cash $5.5B), Q1'26 (GOV +37% incl. Deliveroo). Revenue as a growth-rate path off FY25; FCF = revenue x FCF margin; SBC modeled via rising final_shares (dilution); Gordon terminal. EV/FCF vs UBER/Instacart.

DoorDash 7 Powers · the moat, scored

Bear $103.28 Base $158.19 Bull $237.79

Arena. Local commerce / food delivery — DoorDash (US #1, ~60% restaurant share, New Verticals + ads + Wolt/Deliveroo) vs Uber Eats, Instacart (grocery), Grubhub; defending a network + scale Power as it spends to inflect margins.

POWER AUDIT
dominant-power durability: medium-high

POWER AUDIT · 7 POWERS

Scale Economies	3/3	#1 US volume; logistics density lowers cost/delivery; fixed ad/tech spread over the largest GOV base.
Network Economies · thesis leans here	3/3	The dominant Power: two-sided consumer↔merchant↔Dasher density flywheel.
Counter-Positioning	1/3	Was the suburban-first disruptor; incumbents have matched.
Switching Costs	2/3	DashPass + habit + saved data; modest (multi-homing is easy).
Branding	2/3	Strong US verb-status, not pricing-power branding.
Cornered Resource	1/3	No durable exclusive asset; the Dasher network is replicable.
Process Power	2/3	Logistics/ML routing + ETA accuracy — a real operational edge.

PEER SET

Uber Eats — 18% gr · ~16x EV/FCF
US #2 restaurants + global; bundles with mobility; richer EV/EBITDA.

Instacart (CART) — 10% gr · cheaper
US grocery-delivery leader; high-margin ads, slower GOV growth.

Grubhub — -5% gr · n/a
Distant #3 in US restaurants (<10% share); declining.

Amazon / Walmart — · varies
Grocery/retail-delivery scale — the New-Verticals threat.

THREAT VECTORS · FALSIFIERS

Scale Economies · Uber Eats (US share)
`falsifier:` DoorDash US restaurant share falls below 58% or Uber bundling erodes take rate.

Network Economies · Instacart (grocery)
`falsifier:` DASH grocery unit economics stay negative past 2026.

Counter-Positioning · Gig-worker regulation
`falsifier:` A major-state reclassification ruling structurally raises the Dasher cost base.

> **COMPETITIVE READ**
> DoorDash's network-economies + scale (logistics density) are dominant and durable in US restaurants (~60% share, >2x Uber Eats), and GOV is still compounding +27% — the 40% drawdown is a margin/SBC story, not a growth one. The terminal multiple hinges on whether advertising + New-Verticals scale lift the 2.4%-of-GOV margin without a price war, net of ~$1.3B/yr SBC dilution. At ~33x EV/FCF the 20%+ growth + margin inflection roughly cover the entry — fair, with the sign on the 2H'26 inflection.

DoorDash People · Opportunity · Context · Deal

Bear $103.28 Base $158.19 Bull $237.79

Underwrite the position the way a venture investor underwrites a round — across all four legs, public or private. **People** is the leg scored here (observable only); Opportunity, Context and Deal cross-reference the rest of the memo.

PEOPLE · WHO RUNS / OWNS / FUNDS IT

Tony Xu · founder-led — 13 yrs in seat

12% insider ownership

HIGH key-person risk

Capital allocation (realized)
Growth-by-stock: the $8.1B all-stock Wolt deal (2022) took DoorDash to 27 countries, plus 2025 bolt-ons (Deliveroo, SevenRooms) — capital goes to expansion, funded with equity (dilutive). Buybacks authorized ($1.1B 2024 → only $224M used; $5B 2025 → little executed by mid-year): intent ahead of action. Heavy SBC.

Incentive alignment
Pay-for-performance via the 2020 CEO award (10.4M shares, ~3.5%) that vests only as the stock clears escalating price targets (up to $501 by 2027) — $0 vested in FY2024 when targets were unmet; FY2024 cash comp was a nominal ~$300k salary with no new equity.

GOVERNANCE FLAGS

- multi-class super-voting (Class B = 20 votes) → founders ~54% of votes, all directed by Xu via irrevocable proxy
- CEO + Chairman combined; controlled-company eligible but does not use the exemptions
- classified board; 2021 ISS / Glass Lewis pushback on the structure + pay
- sunset is event / ownership-triggered (no fixed date)

> PEOPLE READ
> Founder-CEO paid only on escalating price hurdles ($0 vested when unmet) and not leaning on the controlled-company exemptions — but the ~54% founder vote is concentrated in one person via an irrevocable proxy, buyback intent has outrun execution, and growth has been bought with dilutive stock.

DoorDash supporting analysis · disclaimers · glossary

Bear $103.28 Base $158.19 Bull $237.79

PUSHBACK · WHY THE BASE CASE IS TOO HARSH

1 **GOV still compounding +27%.**
Down 40% on a margin/SBC concern, not a growth one — GOV $102B (+27%), Q1'26 +37%; the network keeps scaling.

2 **US #1 with network + scale density.**
~60% US restaurant share, >2x Uber Eats; logistics density is a genuine cost moat.

3 **Advertising is the high-margin lever.**
~$1B run-rate, near-100% incremental margin — the single biggest margin-inflection driver.

4 **Net cash $5.5B; first +FY GAAP income 2024.**
Profitability inflected ($123M 2024 → $935M 2025); self-funding, buying back stock.

5 **New Verticals + international optionality.**
Grocery unit economics guided positive 2H'26; Deliveroo/Wolt add 9 countries — TAM expansion.

FALSIFICATION TRIGGERS

Bull validation
grocery/retail unit economics turn positive (2H'26) · advertising passes $1.5B run-rate · GOV margin rises above 3.5% · GOV stays mid-teens+

Bear validation
US restaurant share falls below 58% · grocery stays margin-negative past 2026 · SBC stays >$1.3B/yr · Uber Eats gains share

Reframe needed
if gig-worker reclassification structurally raises the Dasher cost base, re-rate the unit economics + terminal margin

GLOSSARY · CONCEPTS REFERENCED IN THE NARRATIVE

GOV / take rate — Gross order value (~$102B FY25) x ~13.4% take = revenue; the two metrics that drive the model.

New Verticals — Grocery / convenience / retail delivery — the fastest-growing, margin-dilutive-today segment guided to positive unit economics 2H'26.

Network economies — Helmer Power: more consumers → more merchants/Dashers → density → speed/selection; the core moat.

SBC dilution — Stock-based comp ~$1.3-1.4B/yr (> GAAP net income) — modeled here as a rising share count; the sharpest bear point.

FCF margin — Free cash flow / revenue (~13% FY25, inflecting); the mature-DCF lever as ads + New Verticals scale.
