

Airbnb

NASDAQ : ABNB · \$95.75B mkt cap · 650M sh · \$9.5B cash, zero debt · ~\$9.5B net cash; ~650M diluted shares; ~\$3.8B/yr buyback offsets SBC; Revenue Mature-Company DCF \$12.24B FY25 (+10%, decel from +40%); 38% FCF margin, \$4.6B FCF; ~15x EV/FCF; Experiences/Services relaunch (2025) the swing optionality

\$147.31

THE CENTRAL QUESTION

Does Airbnb's ~15x EV/FCF fairly price a decelerating but FCF-gushing travel network — or is the Experiences/Services optionality + international runway underpriced?

Airbnb trades at ~\$79B (~\$133/sh) — ~15x EV/FCF on a \$4.6B-FCF, 38%-margin two-sided travel network with ~\$9.5B net cash. Growth has decelerated (+40%→+10%, guided low-mid-teens) and regulation (Barcelona, NYC) caps dense-urban supply. The mature DCF asks whether the verb-grade brand + network defend the FCF and whether Experiences/Services + international re-accelerate growth. The finding: at ~15x FCF for this quality the modal case implies modest undervaluation — the premium-to-Booking is on P/E, not on the cash flow the DCF values.

PROBABILITY-WEIGHTED EXPECTED VALUE

\$183.95 expected fair value today
+24.9% vs spot \$147.31

FORWARD COMPOUNDED VALUE

+5y	+10y	+15y	+20y

	-27.7% vs spot		-7.0% vs spot		+24.1% vs spot		+64.4% vs spot		+108.0% vs spot
Probability 12%		Probability 25%		Probability 35%		Probability 20%		Probability 8%	
Regulation + maturation; growth stalls.		Decelerates to high-single; regulation bites.		Low-mid-teens growth; Experiences ramps.		Experiences/Services + international re-accel.		End-to-end travel hub; AI concierge.	
WHY 12%		WHY 25%		WHY 35%		WHY 20%		WHY 8%	
Regulation is the structural bear: NYC listings fell ~92%, Spain fined Airbnb EUR65M. 12% weight on bans + maturation capping the network.		The law-of-large-numbers + Booking competition path. 25% weight — a very plausible 'matures gracefully' outcome.		Requires the guided low-mid-teens growth + modest Experiences/Services monetization. 35% as the central outcome — the network + brand are genuinely durable.		Experiences/Services monetizes into a needle-mover + international compounds. ~20%; the relaunch is early but credible.		The full 'Airbnb everything' hub + AI concierge. ~8%, the asymmetric upside the Experiences/Services bet is really for.	
WHAT HAPPENS		WHAT HAPPENS		WHAT HAPPENS		WHAT HAPPENS		WHAT HAPPENS	
City STR bans spread (Barcelona's 2028 phase-out as the template), growth decays toward GDP-plus, and Experiences/Services never monetizes. Revenue grows only ~3%; the premium multiple de-rates toward Booking's.		Growth settles in the high-single digits as Booking out-executes in alternative accommodations and regulation nibbles supply; FCF margin holds ~37%.		The modal path: revenue compounds low-mid-teens (the 2026 guide), Experiences/Services begins to monetize, and international under-penetration carries the network at a 38-39% FCF margin.		Experiences/Services becomes a real second leg, international scales, and AI-driven conversion lifts the take rate — revenue re-accelerates to the mid-teens at a 40% FCF margin.		Airbnb becomes an end-to-end travel/lifestyle platform (homes + services + experiences + AI concierge), expanding TAM well beyond rentals at peak network margins.	
DCF ~\$106 (-20%) — a great FCF machine, but priced for the growth it has stopped delivering.		DCF ~\$137 (+3%) — roughly fair; the network defends the cash even as growth matures.		DCF ~\$183 (+37%). A verb-grade FCF machine at ~15x FCF is mispriced for this quality if growth holds in the teens.		DCF ~\$242 (+82%) — the optionality the relaunch is buying actually pays off.		DCF ~\$306 (+130%) — the platform vision fully realized; ~8% probability.	

Airbnb business snapshot

Bear \$136.97 Base \$182.78 Bull \$242.25

FY21-FY25 history + FY26-FY30 scenario projections · calendar fiscal year · FY2025 10-K (Feb'26)

Sources: Airbnb FY2025 10-K (revenue \$12.24B, FCF \$4.6B/38%, ~\$9.5B net cash, GBV \$91.3B), Q1'26 results. Revenue as a growth-rate path off FY25; FCF = revenue x FCF margin (use ~38% structural, not the seasonal Q1 64%); Gordon terminal. EV/FCF vs Booking/Expedia.

Airbnb 7 Powers · the moat, scored

Bear \$136.97 Base \$182.78 Bull \$242.25

Arena. Travel / lodging + experiences — Airbnb (two-sided STR marketplace, ~8M listings, verb-grade brand) vs Booking, Expedia/Vrbo, Google Travel, hotels; defending a network + brand Power as growth matures and regulation tightens.

POWER AUDIT
dominant-power durability: medium-high

POWER AUDIT · 7 POWERS

Scale Economies 	Fixed platform/trust-&-safety/marketing spread over \$91B GBV → best-in-class ~38% FCF margin.
Network Economies · thesis leans here 	The dominant Power: two-sided host↔guest density; more hosts → more guests → more hosts.
Counter-Positioning 	Was the disruptor vs hotels; incumbents (Booking, Vrbo) have matched the STR model.
Switching Costs 	Weak-medium: hosts multi-list; guests are promiscuous.
Branding 	'Airbnb' is a verb; direct-traffic advantage lowers CAC vs OTAs — durable demand-side Power.
Cornered Resource 	No durable exclusive asset; supply is replicable.
Process Power 	Matching/pricing/trust-and-safety execution at scale.

PEER SET

Booking Holdings Larger GBV; pushing into alternative accommodations (>8M listings, growing faster than ABNB there).	13% gr · 36% mgn · ~15.6x P/E
Expedia / Vrbo #3 OTA; Vrbo the direct STR competitor.	6% gr · 15% mgn · ~11.8x P/E
Google Travel Disintermediation risk at the search layer.	· n/a
Hotels / chains Direct booking + loyalty; the alternative for urban stays.	5% gr · varies

THREAT VECTORS · FALSIFIERS

- Network Economies** · Booking in alternative accommodations
falsifier: Booking out-grows ABNB in alt-accommodations bookings for 2+ years.
- Branding** · Google Travel disintermediation
falsifier: Paid-search dependence rises and direct-traffic share falls.
- Scale Economies** · STR regulation
falsifier: A flagship metro structurally bans STRs, or registration regimes materially shrink supply.

COMPETITIVE READ

Airbnb's network-economies + verb-grade brand are genuinely durable on the demand side (direct traffic, two-sided liquidity), and the ~38% FCF margin is best-in-class. The terminal-value debate is not a competitor out-networking them — it's regulation (dense-urban supply caps) + growth maturation. At ~15x EV/FCF the cash flow is priced cheaply for the quality; the Experiences/Services relaunch is the unpaid-for optionality, and the sign hinges on whether growth holds in the teens or decays to GDP-plus.

insider ownership

HIGH

key-person risk

Capital allocation (realized)
Disciplined capital return + organic build: FY2024 buybacks ~\$3.4B, a fresh \$6B authorization (~\$6.6B remaining) steadily cutting the share count, against ~\$2.1B product-development reinvestment. Build-not-buy (no transformative M&A); no dividend. SBC ~\$1.4B partly offsets the buyback.

Incentive alignment
\$1 salary, no cash bonus; paid via a 2020 ten-year performance RSU (~12M units) that vests only against escalating share-price hurdles (Tranche 2 vested Nov 2024). Chesky has pledged to donate the net proceeds of his CEO equity to charity.

GOVERNANCE FLAGS

- multi-class super-voting (Class B = 20 votes) → founder bloc ~79% voting control (binding agreement)
- CEO + Chairman combined (lead independent director)
- fully-independent board committees; classified board
- sunset: Class B converts by 2040 (or 9 months after a founder's death / disability)

PEOPLE READ

Founder-CEO on a \$1 salary, paid only if the stock clears price hurdles, returning capital through large buybacks — strong alignment and capital discipline, with a 2040 sunset on the control. The offset is a ~79% founder voting bloc + combined CEO/Chair concentrating control well above the ~14% economic stake.

Airbnb supporting analysis · disclaimers · glossary

Bear \$136.97 Base \$182.78 Bull \$242.25

PUSHBACK · WHY THE BASE CASE IS TOO HARSH

- 1

~15x EV/FCF, 38% FCF margin.
A verb-grade two-sided network throwing off \$4.6B FCF at a 38% margin — priced like a maturing OTA, not a durable platform.
- 2

\$9.5B net cash, working-capital-positive.
Guest pre-payments fund the float → structurally high FCF conversion; fortress balance sheet, ~\$3.8B/yr buyback.
- 3

Network economies + a verb brand.
'Airbnb' is the default for alternative accommodations; direct traffic lowers CAC vs OTAs — the two-sided liquidity moat.
- 4

Experiences/Services optionality is free.
The 2025 relaunch expands TAM beyond rentals; unmonetized today, so any traction is upside the multiple doesn't pay for.
- 5

International under-penetrated.
Latin America / Asia-Pacific grow faster than core — a multi-year runway the US-centric view misses.

FALSIFICATION TRIGGERS

Bull validation revenue re-accelerates to mid-teens · Experiences/Services monetizes into a reported needle-mover · take rate rises · international outgrows core	Bear validation growth decays to high-single · major-metro bans spread · Booking out-grows ABNB in alternative accommodations · multiple de-rates toward peers	Reframe needed if a flagship market structurally bans STRs or Google disintermediates search, re-rate the network durability + terminal multiple

GLOSSARY · CONCEPTS REFERENCED IN THE NARRATIVE

GBV / take rate — Gross booking value (~\$91B FY25) x ~13.4% take = revenue; the two metrics that drive the model.	Network economies — Helmer Power: more hosts → more guests → more hosts; the two-sided liquidity flywheel that is Airbnb's core moat.	Experiences / Services — The 2025 relaunch (locally-hosted activities + in-stay services); the TAM-expanding optionality, unmonetized today.
FCF margin — Free cash flow / revenue (~38% structural; ignore the seasonal Q1 ~64% float build) — the mature-DCF lever.	STR regulation — Short-term-rental bans/registration (Barcelona 2028 phase-out, NYC -92%) — the structural cap on dense-urban supply.
