Lululemon Athletica

NASDAQ : LULU · Mature-Company DCF

$11.01B mkt cap · 114M sh · $1.8B cash, zero debt · $1.8B cash, no debt; ~114M shares; heavy buyback, no dividend; Revenue $11.1B FY25 (+5%, decelerating from +42%); ~22% op margin, ~$1.58B FCF; Down ~72% from the $340 high; US declining, China/international +20-29%

22 October 2026 · the qualitative

$96.53

THE CENTRAL QUESTION

Is lululemon's ~72% de-rating to ~8x FCF an overshoot on a still-profitable premium brand — or the early innings of structural brand impairment (US decline, Alo/Vuori share loss)?

Lululemon trades at ~$11B (≈$97/sh, down ~72% from $340) — ~8x FCF on $11.1B revenue, ~22% operating margins, net cash and a heavy buyback. Growth has decelerated hard (+42%→+5%, guided +2-4%): the US is shrinking (-1 to -3%) while China/international compound +20-29%. The mature DCF asks whether the brand stabilizes and defends margins, or whether dupes (Alo, Vuori) and stale product structurally impair it. The finding: even pricing real brand-impairment downside (ultra-bear -12%), the modal stabilization case at 8x FCF implies the de-rating overshot.

Lululemon Athletica scenario narratives

PROBABILITY WEIGHTS

Ultra Bear 15% Bear 27% Base 45% Bull 10% Ultra Bull 3% · Weighted expected $205.93 (+113.3% vs spot)

ULTRA BEAR $84.51

-12.5% vs spot

Probability 15%

Brand impairment; US decline; margins crater.

WHY 15%

The genuine bear: the founder himself called the product stale, US (50%+ of sales) is already declining, and DTC share fell 30%→24% in a year. 15% weight on real brand impairment.

WHAT HAPPENS

Brand heat fades like Under Armour's: US revenue keeps declining, Alo/Vuori and dupes take share, and the full-price model erodes into promotions. Revenue falls ~4%/yr; operating margins compress toward single digits.

A shrinking premium brand earns a distressed multiple — DCF ~$85, ~12% below spot. The net cash and buyback cushion the floor but can't offset structural impairment.

BEAR $157.77

+63.4% vs spot

Probability 27%

Share loss continues; US shrinks; capped.

WHY 27%

Share loss continues and the dupe pressure caps the multiple, but the brand doesn't break. 27% weight as the plausible 'stalls but survives' path given the bearish US momentum.

WHAT HAPPENS

The US stays soft and international decelerates; lululemon holds its position but doesn't grow, and tariffs/promotions keep margins below the historical peak. Revenue roughly flat, low-teens FCF margin.

DCF ~$158 (+63%) — even a 'dominant but ex-growth' brand at ~11x FCF is worth more than today's price; the de-rating already prices worse.

BASE $235.52

+144.0% vs spot

Probability 45%

US stabilizes; China/international compounds.

WHY 45%

Requires US stabilization (not re-acceleration) plus continued international compounding — consistent with FY26 guidance. 45% as the central outcome; the brand's cornered-resource fabrics + community don't vanish.

WHAT HAPPENS

The modal path: the US stabilizes under new CEO Heidi O'Neill (ex-Nike) while China/international keep compounding ~20%, blending to ~4% total growth at a defended ~22% operating margin.

DCF ~$236 (+144%). A stabilizing premium brand at 8x FCF with a long international runway is simply mispriced if the modal case plays out — the core of the thesis.

BULL $324.02

+235.7% vs spot

Probability 10%

New-CEO turnaround; margin recovery.

WHY 10%

O'Neill's product fix works and the US re-accelerates while international compounds — a real turnaround. ~10% weight; lululemon has done it before.

WHAT HAPPENS

The turnaround lands: product newness re-accelerates the US, international/China stay hot, footwear/men's scale, and margins recover toward 24%. Revenue compounds ~7%.

DCF ~$324 (+236%) — back toward the old growth-compounder valuation as the brand re-rates with the fundamentals.

ULTRA BULL $409.07

+323.8% vs spot

Probability 3%

Full re-rate; China + footwear scale.

WHY 3%

Everything works — US turnaround AND China AND categories AND a multiple re-rating. ~3%, the asymmetric upside the depressed entry is buying.

WHAT HAPPENS

The full turnaround: China becomes a second home market, footwear/men's/international all compound, and lululemon re-rates to a premium growth multiple. Revenue ~10% CAGR at peak margins.

DCF ~$409 (+324%) — the brand reclaims its compounder status; ~3% probability.

Lululemon Athletica 7 Powers · the moat, scored

Bear $157.77 Base $235.52 Bull $324.02

Arena. Premium athleisure — lululemon (brand + proprietary fabrics, ~60% DTC) vs Nike, Alo Yoga, Vuori, Athleta, On, fast-fashion dupes; defending a premium brand Power as US share erodes.

POWER AUDIT
dominant-power durability: medium

POWER AUDIT · 7 POWERS

Scale Economies	Sourcing/marketing leverage at $11B revenue, but apparel scale is limited vs Nike.
Network Economies	Community/ambassadors are brand affinity, not a hard network.
Counter-Positioning	Was the women's-first disruptor; now the incumbent being counter-positioned by Alo/Vuori.
Switching Costs	Weak — apparel is promiscuous; this is why dupes bite.
Branding · thesis leans here	The dominant Power: premium pricing, cult community, ~58% gross margin — but eroding in US (DTC share 30%→24%).
Cornered Resource	Proprietary fabrics (Nulu/Luxtreme/Everlux) + fit/quality + patents — durable, the hardest piece to dupe.
Process Power	Design/supply learning curve; modest.

PEER SET

Nike — 2% gr · 11% mgn · ~25x P/E
Scale leader, mid-cycle reset; women's/DTC is lululemon's edge vs Nike.

Alo Yoga — · private
Influencer-led, fashion-forward; ~88% growth, taking US share at higher tickets.

Vuori — · private
Workout-to-everyday; ~33%+ growth, premium-priced, gaining share.

On Holding — 30% gr · 10% mgn · ~45x P/E
Premium performance, fast-growing; adjacency pressure.

THREAT VECTORS · FALSIFIERS

Branding · Alo Yoga + Vuori (US share)
falsifier: Americas revenue declines for 2+ years while DTC share falls below 22%.

Counter-Positioning · Fast-fashion dupes
falsifier: Gross margin compresses below 55% on sustained promotions/markdowns.

Scale Economies · Nike / macro down-trade
falsifier: International growth decelerates below 10% while the US keeps shrinking.

COMPETITIVE READ

lululemon's brand Power is genuinely durable internationally (China +29%, only 16% of revenue) and underpinned by cornered-resource fabrics, but it is eroding in the saturated US where Alo/Vuori and dupes are taking DTC share and the founder calls the product stale. The ~72% de-rating to ~8x FCF prices structural impairment; the DCF tests whether the brand stabilizes — and even a real-impairment ultra-bear is only -12%, while the modal stabilization implies the sell-off overshot.

PEOPLE · WHO RUNS / OWNS / FUNDS IT

Interim co-CEOs (M. Frank, A. Maestrini)

7%
insider ownership

MEDIUM
key-person risk

Capital allocation (realized)
No dividend; capital returned via large executed buybacks (~$2.5B / 9.1M shares Dec-2023→Aug-2025; +$1.0B Dec 2025, ~$1.6B remaining), otherwise reinvested in stores/product. The one notable deal — Mirror (~$500M, 2020) — failed: a ~$443M post-tax impairment (FY2022), hardware ceased 2023.

Incentive alignment
Standard structure (base + cash bonus + majority-equity PSU LTI). Say-on-pay passed but support slipped 93% (2024) → 83% (2025), into the range proxy advisors flag, and two directors drew weak support (76% / 72%).

GOVERNANCE FLAGS

- single-class (one share, one vote)
- independent chair, separate from CEO; but classified (staggered) board
- founder Chip Wilson ~8.7% (off the board since 2015) ran a public proxy fight
- settled May 2026: 2 Wilson nominees (+1 more) + a declassification commitment; ~18-mo standstill

> **PEOPLE READ**
> Professionalized and single-class with an independent chair and disciplined buybacks — but a live governance moment: CEO Calvin McDonald is out (Jan 2026; interim co-CEOs + external search), a founder proxy fight just settled (Chip Wilson ~8.7%, two board seats), a classified board, the failed Mirror deal, and slipping say-on-pay support.

NOT INVESTMENT ADVICE · Not from a registered investment advisor · AI-assisted analysis · Author may hold positions · See full disclaimers, page 7

Lululemon Athletica supporting analysis · disclaimers · glossary

Bear $157.77 Base $235.52 Bull $324.02

PUSHBACK · WHY THE BASE CASE IS TOO HARSH

1 **~8x FCF for a 22%-margin brand.**
Net-cash, $1.58B FCF, ~22% operating margin — priced like a terminal-decline retailer, not a premium brand.

2 **Cornered-resource fabrics.**
Proprietary Nulu/Luxtreme/Everlux blends + fit/quality are the hardest thing for Alo/Vuori/dupes to replicate.

3 **Huge international runway.**
China +29%, international +22%, only ~16% of revenue — a multi-year growth engine the US weakness masks.

4 **Heavy buyback at the lows.**
No dividend; ~$1.6B authorization remaining, retiring shares at ~8x FCF — accretive.

5 **New CEO from Nike.**
Heidi O'Neill (ex-Nike) + a settled founder proxy fight = fresh product/turnaround optionality.

FALSIFICATION TRIGGERS

Bull validation

US/Americas revenue returns to growth · international stays >20% · gross margin re-expands above 58% · footwear/men's scale

Bear validation

Americas declines for 2+ years · DTC share falls below 22% · gross margin compresses below 55% on sustained promotions

Reframe needed

if the brand goes structurally cold (Under-Armour path) the cornered-resource Power erodes — re-rate the terminal toward a commodity-apparel multiple

GLOSSARY · CONCEPTS REFERENCED IN THE NARRATIVE

DTC / wholesale — Direct-to-consumer (stores + digital, ~60% of sales, higher margin) vs wholesale; the channel mix that supports the brand premium.

Cornered resource — Helmer Power: proprietary fabrics + fit/quality that rivals can't easily copy — lululemon's most durable moat.

Dupes — Lower-priced look-alikes (and premium challengers Alo/Vuori) eroding lululemon's US share — the central bear mechanism.

FCF margin — Free cash flow / revenue (~14% in FY25); the mature-DCF lever the 22% operating margin converts to.

Power of Three x2 — Management's plan to double men's + digital and quadruple international vs 2021 — now at risk on the FY26 guide.
